

# CLIENT SERVICES

## ACCOUNTING SERVICES

**LISTENING.** That is the right place for us to start a client relationship. It is something that continues - and develops - as the relationship grows.

Whether you are operating a mature business or starting a new one, you know the importance of accurate accounting processes and records. We know the value of what those records can reveal to help strengthen and grow your business. Analysis of the information we gather from your accounting and financial data allows us to assist you in better operating your business.

By listening to your goals and ideas, we can use the data we assemble from the accounting services to help you pursue those goals.

Spend your time on the major issues of your business while utilizing accounting information germane to your goals. Utilizing Price CPAs accounting and financial services can provide additional comfort that your accounting and financial information is on target with what you need to grow your company.

Here are some of the services we provide - using the most recent methods and practices - on a monthly, quarterly or annual basis:

- Chief Financial Officer/Comptrollership
- Complete In-House Bookkeeping
- General Accounting Services
- Oversight of Internal Financial and Accounting Systems

Call **Alan Webb, CPA** or **Daniel Widick, CPA** today to find out more about how Price CPAs can provide the right accounting and financial information services to help make your business more efficient and financially healthy. You can reach them at 615.385.0686
